

Veterinary Prescription Allergy Diets for Dogs:

When switching to an allergy diet, all of the different options can be overwhelming. Below is a list of some of the most common diets on the market. Please note that we do not have a vested financial interest in any of these foods. They meet the necessary nutrition requirements from AAFCO, adhere to strict quality controls, and employ veterinary nutritionists.

Royal Canin Veterinary Diets:

- *Hydrolyzed Protein HP*
 - Available in dry/canned, adult/puppy, small/large breed, and moderate calorie formulas
 - This diet is formulated with hydrolyzed proteins, which are composed of low molecular weight peptides that can be absorbed in the digestive tract with a reduced risk of triggering an immune reaction.
 - Optimal amounts of B vitamins and amino acids reinforce your dog's skin barrier.
 - Omega-3 fatty acids EPA and DHA help promote healthy skin and coat.
 - An exclusive blend of fibers helps support healthy digestion in dogs prone to digestive upsets, including diarrhea.

- *Skintopic*
 - Available in dry/canned, small/large breed formulas
 - Royal Canin Skintopic Adult Dry Dog Food helps promote skin health in dogs with environmental sensitivities.
 - Dogs with sensitivities to environmental irritants may show dermatological and gastrointestinal signs. Environmental irritants can negatively impact a dog's behavior and quality of life.
 - This long-term diet can help reinforce the skin barrier and promote a strong immune system.
 - Targeted nutrition for your dog with a unique blend of nutrients (Dermauxilium Complex) with antioxidants, including vitamins A and E; minerals; and biotin to support skin quality and coat health.
 - Plus, this dog food helps soothe and nourish skin and supports healthy digestion.

- *Ultamino*
 - Available in a dry formula
 - Royal Canin Veterinary Diet Ultamino Dry Dog Food is an innovative diet formulated as a nutritional solution for pets with severe food sensitivities.

- Clinically proven and highly palatable formula contains a protein source that is broken down to an amino acid level, so it can be absorbed in the digestive tract with reduced risk of triggering a food sensitivity.
- Optimal amounts of B vitamins and amino acids reinforce your dog's skin barrier.
- Omega-3 fatty acids EPA and DHA help promote healthy skin and coat.
- An exclusive blend of fibers helps support healthy digestion in dogs prone to digestive upsets, including diarrhea

Hill's Prescription Diets:

- *z/d Skin/Food Sensitivities*
 - Available in dry/canned, large/small breed, and low fat diets
 - Helps improve your dog's digestion and stool quality with highly hydrolyzed protein.
 - Helps eliminate food-related causes of skin irritation and results in a visible improvement of the skin and coat.
 - Helps maintain a healthy skin barrier and enriched with essential fatty acid.
 - Clinically proven antioxidants are added for optimal health benefits, plus it's developed with a single carbohydrate source—cornstarch.
 - Plus, with the S+OXSHIELD seal of confidence, the Skin/Food Sensitivities formula meets specific nutrient standards shown to promote a urinary environment that helps reduce the risk of struvite and calcium oxalate crystals.
- *d/d Skin/Food Sensitivities*
 - Available in dry/canned formulas
 - Multiple flavors: potato/venison, potato/duck, potato/salmon
 - Highly digestible single intact animal protein source and single carbohydrate source to help avoid common food sensitivities in a gluten-free formula
 - High levels of omega-6 and omega-3 fatty acids that help nourish the skin and coat
 - Combination of clinically proven antioxidants helps maintain a healthy immune system and skin barrier function
 - Four different novel protein sources to provide more choices in managing food sensitivity
 - Helps improve digestion and stool quality with visible improvements in the skin and coat
- *Derm Complete*
 - Dry food is available in adult and puppy formulas; canned adult food also available
 - May help show visible skin improvement in dogs with food sensitivities.
 - May help improve night-time scratching and improve sleep quality in some dogs.
 - Helps support the skin barrier year-round against environmental irritants.
 - Contains a single animal protein source.

- Bioactives and phytonutrients can help normalize immune response.

Purina Pro Plan Veterinary Diets:

- *HA Hydrolyzed Dog Food*
 - Available in dry/canned formulas
 - Dry Flavors available: chicken, salmon, vegetarian
 - Canned flavor - chicken
 - Features hydrolyzed proteins—these proteins have been broken down into small components to be less likely to cause an adverse food reaction in certain dogs.
 - Provides a single source of carbohydrates and high-quality proteins.
 - Highly digestible formula promotes optimal nutrient absorption.
 - Suited for dogs with food allergic gastroenteritis or dermatitis, food intolerance, inflammatory bowel disease or pancreatitis.
 - Contains coconut oil, a source of medium-chain triglycerides, to promote alertness and mental sharpness in dogs ages seven and older.
- *DRM Dermatologic Management Naturals*
 - Available as a dry, adult formula
 - Sensitive skin formula supports skin and coat health.
 - Omega-3 and omega-6 fatty acids support skin and coat health.
 - Natural kibble with added vitamins, minerals, and nutrients is easy to digest.
 - Free of corn, wheat, or artificial colors and flavors.
 - Rich in antioxidants for immune support, plus vitamin E
